Professional Summary

Senior Backend Engineer with 7+ years of experience architecting scalable distributed systems, microservices, and REST APIs using Python, FastAPI, and Django. Passionate about asynchronous performance and clean architecture.

Technical Skills

Python (FastAPI, Django, Flask), PostgreSQL, Redis, Docker, Kubernetes, AWS, Celery, Kafka, Git

Work Experience

Staff Python Engineer - Apex Cloud Systems (2022 - Present)

Engineered high-throughput event processing pipelines in Python processing over 10M events daily with Redis & Kafka. Optimized query performance by 40%.

Backend Software Developer - FinTech Nexus (2019 - 2022)

Developed modular Python REST APIs for digital payment workflows using FastAPI and PostgreSQL, guaranteeing 99.99% system availability.

Education

B.S. in Computer Science - University of California, Berkeley (2018)
